Preface	xi
Acknowledgements	xiii
1 Law and the Information Society	1
1.1 The Information Society . . . . .	1
1.1.1 The Network Society . . . . .	3
1.1.2 Social Reality, Data, Processes, and Legal Protection . . . . .	4
1.1.3 The Dynamics of the Information Society . . . . .	6
1.1.4 The Network Effect . . . . .	7
1.1.5 Network Effect and Monopolies . . . . .	9
1.1.6 Information Asymmetry and Other Trends in the IT Market . . . . .	11
1.2 Technologies, Society, and the Law . . . . .	12
1.2.1 Legal Informatics . . . . .	13
1.2.2 Computer Law . . . . .	17
1.3 A New Mission for the Law . . . . .	19
2 Computers	21
2.1 Computers: Machines for Processing Information . . . . .	21
2.1.1 Hardware and Software . . . . .	21
2.1.2 The Precursors of Computers . . . . .	22
2.1.3 Programmable Machines . . . . .	22
2.1.4 Alan Turing and the Universal Turing Machine . . . . .	24
2.1.5 The Von Neumann Architecture . . . . .	26
2.1.6 Moore's Laws . . . . .	27
2.2 The Personal Computer (PC) and Networks . . . . .	29
2.2.1 Interaction by Means of a Computer Network . . . . .	29
2.2.2 Man-Machine-Environment Interaction . . . . .	31
2.2.3 Client-Server and Peer-to-Peer . . . . .	32
2.2.4 Cloud Computing . . . . .	34

2.3	Computers as Digital Programmable Machines . . . . .	36
2.3.1	Analogical and Digital Representations . . . . .	36
2.3.2	The Binary System . . . . .	38
2.3.3	Boolean Algebra and Computers . . . . .	40
3	The Code: Algorithms and Programs . . . . .	45
3.1	Code as Law . . . . .	45
3.2	Programs and Algorithms: Introduction . . . . .	48
3.2.1	Algorithms: Examples and Errors . . . . .	51
3.2.2	Algorithm: a more complete definition . . . . .	54
3.2.3	The Correctness of an Algorithm . . . . .	55
3.2.4	Efficiency and Computational Complexity . . . . .	57
3.3	From Algorithms to Programming Languages . . . . .	57
3.3.1	From Machine Language to Assembler . . . . .	58
3.3.2	High-Level Languages Compared to Machine Language . . . . .	58
3.3.3	From source Code to Object Code: Interpretation . . . . .	59
3.3.4	From Source Code to Object Code: Compilation . . . . .	60
4	Software and Digital Goods . . . . .	63
4.1	Software as an Economic Good . . . . .	63
4.2	The Proprietary Model of Software Protection . . . . .	64
4.2.1	Justification of, and Issues with, the Proprietary Model . . . . .	65
4.3	Free Software and Open Source Models . . . . .	66
4.3.1	GPL License and Copyleft . . . . .	67
4.3.2	Issues with the Free Software / Open Source Software Model . . . . .	68
4.3.3	Development of Free Software / Open Source Software . . . . .	69
4.4	Peer Production . . . . .	69
4.4.1	Creative Commons . . . . .	70
5	Computers and Data . . . . .	73
5.1	Data and Conceptualisation . . . . .	73
5.1.1	The Semiotic Triangle . . . . .	73
5.1.2	Classes, Instances, Attributes, Relationships . . . . .	74
5.2	Files and File Formats . . . . .	76
5.3	Databases and Information Retrieval Systems . . . . .	79
5.3.1	Queries and Performance of Information Retrieval . . . . .	80
5.4	Markup Languages . . . . .	82
5.4.1	HTML language . . . . .	85
5.4.2	XML . . . . .	86
5.4.3	DTD and XML Standards . . . . .	87
5.5	Legal Ontologies . . . . .	91

5.6	Cryptography . . . . .	96
5.6.1	Symmetric and Asymmetric Cryptographic Systems . . . . .	96
5.7	Digital Signature . . . . .	97
5.7.1	Digital Signature: the Process . . . . .	98
5.8	Electronic Signatures in EU and Italian Law . . . . .	100
5.8.1	Advanced electronic signature and qualified electronic signature	100
5.8.2	The Digital Signature in the Italian Law . . . . .	100
5.9	Cryptography and Blockchain . . . . .	101
6	Big Data and Algorithmic Decision-Making	103
6.1	Big Data . . . . .	103
6.2	Algorithmic Decision-Making . . . . .	106
6.2.1	Machine Learning Methods . . . . .	107
6.2.2	Data Mining Examples . . . . .	108
6.3	Legal Challenges . . . . .	109
6.4	The General Data Protection Regulation . . . . .	112
6.4.1	Profiling and Discrimination . . . . .	113
6.4.2	Consent and Purposes . . . . .	115
6.4.3	Pseudonymisation . . . . .	115
6.4.4	Transparency and Explanations . . . . .	116
7	Internet	119
7.1	Introduction to Internet . . . . .	119
7.1.1	Origins and Architecture of Internet . . . . .	120
7.1.2	Internet Layers and Protocol Stack . . . . .	123
7.1.3	Net-Neutrality . . . . .	125
7.2	Internet Standards . . . . .	126
7.3	IP Address . . . . .	127
7.4	Domain Names and DNS . . . . .	128
7.5	Identification on the Internet . . . . .	130
7.5.1	Server Logs . . . . .	130
7.5.2	Identification: Cookies . . . . .	132
7.6	The WWW (World Wide Web) . . . . .	135
7.7	Internet Governance . . . . .	136
7.8	Semantic Web and the Law . . . . .	137
8	Artificial Intelligence and Law	141
8.1	Artificial Intelligence . . . . .	141
8.2	Contributions to Artificial Intelligence . . . . .	144
8.3	Strong AI and Weak AI . . . . .	145
8.3.1	Alan Turing and the Turing Test . . . . .	145

8.3.2	John Searle and the Chinese Room . . . . .	146
8.4	Connectionism and Neural Networks . . . . .	148
8.5	Explicit Knowledge and Reasoning . . . . .	149
8.5.1	Knowledge Based-Systems . . . . .	149
8.5.2	Automated Reasoning and Application of Rules . . . . .	150
8.5.3	Rule-Based Systems for the Legal Domain . . . . .	152
8.5.4	Legal Knowledge Representation . . . . .	152
8.5.5	Oracle Policy Automation . . . . .	155
8.5.6	Agent-based systems . . . . .	157
9	Automation and Liability	161
9.1	Introduction . . . . .	161
9.2	Automation and Socio-Technical Systems . . . . .	162
9.3	Task-Responsibilities and the Impact of Automation . . . . .	164
9.4	Actor-Based Analysis of Liability . . . . .	166
9.4.1	Liability of Individuals . . . . .	167
9.4.2	Liability of Enterprises . . . . .	168
9.5	Levels of Automation and Allocation of Liability . . . . .	170
10	Machine Learning	173
10.1	Artificial Neural Networks and Machine Learning, the Origins . . . . .	173
10.2	The Connectionist Paradigm . . . . .	177
10.3	Machine Learning: from Distributed AI to Robots . . . . .	178
10.4	Artificial Neural Networks, Machine Learning and the Law . . . . .	182
	Appendices	195
A	Copyright and Patents: an Introduction	197
A.1	Copyright Protection . . . . .	197
A.2	Economic Rights . . . . .	198
A.2.1	Types of Protected Works . . . . .	199
A.3	Software Protection . . . . .	200
A.3.1	Object of the Protection . . . . .	200
A.3.2	Exclusive Rights . . . . .	200
A.3.3	Civil and Criminal Sanctions . . . . .	201
A.3.4	Exceptions and Decompilation . . . . .	202
A.4	Patent protection . . . . .	204

B The Liability of Internet Service Providers	207
B.1 Provider's Liability: Introduction . . . . .	207
B.2 Providers' Liabilities in US Law . . . . .	208
B.3 Providers' Liabilities in EU Law . . . . .	209
B.3.1 Mere Conduit and Caching . . . . .	209
B.3.2 Hosting . . . . .	211
B.4 Open Issues . . . . .	213
B.5 Platforms, Intellectual Property and Data Protection . . . . .	215
B.6 Providers' Liabilities in Italy . . . . .	218

Finito di stampare nel mese di novembre 2017  
nella Stampatre s.r.l. di Torino  
Via Bologna, 220

# INFORMATICA GIURIDICA

*Collana coordinata da*  
MARIO JORI – GIOVANNI SARTOR

---

## **Volumi pubblicati**

### **Serie Ricerche**

1. CLAUDIO DI COCCO, *L'opera multimediale. Qualificazione giuridica e regime di tutela*, 2005, pp. 272.
2. CARLA FARALLI-RAFFAELLA BRIGHI-MICHELE MARTONI (a cura di), *Strumenti, diritti, regole e nuove relazioni di cura. Il Paziente europeo protagonista nell'eHealth*, 2015, pp. XII-356.

### **Serie Didattica**

1. MARIO JORI (a cura di), *Elementi di informatica giuridica*, 2006, pp. XX-308.
2. GIOVANNI SARTOR, *L'informatica giuridica e le tecnologie dell'informazione. Corso d'informatica giuridica*, terza edizione, 2016, pp. XII-436.
3. CLAUDIO DI COCCO-GIOVANNI SARTOR, *Temi di diritto dell'informatica*, III edizione, 2017, pp. X-214.
4. MONICA PALMIRANI-MICHELE MARTONI, *Informatica giuridica per le relazioni aziendali*, 2012, pp. X-150.
5. MARIA ANGELA BIASOTTI-GIOVANNI SARTOR, *Tecnologie e abilità informatiche per il diritto*, 2012, pp. 216.
6. GIUSEPPE CONTISSA, *Information Technology for the Law*, 2017, pp. XIV-234.
