## Chapter I From bioethics to biolaw

1. Ethical debate in bioethics	1
1.1. Liberal-libertarian theory	2
1.2. Utilitarian theory	4
1.3. Principlism	8
1.4. Virtue ethics	10
1.5. Personalist theory	12
1.6. Communitarian theory	15
1.7. Principle of responsibility	18
2. Person and human beings: a philosophical controversy	20
2.1. What is a person? Who is a person?	20
2.2. Not all human beings are persons, not all persons are human	20
2.3. All human beings are persons	23
3. Ethical pluralism and biolaw	25
3.1. What is biolaw	25
3.2. Models of biolaw	28
3.3. The relationship between biolaw and biopolitics	30
3.4. The role of Bioethics Committees: seeking shared basic principles/values	33
3.5. The evolution of biolaw in the international con- text	36

Chapter II  
**Questions under discussion**

<b>I. Questions at the beginning of life</b>	41
1. The status of the human embryo	41
1.1. The embryo as a human being, a human individual, a human person	41
1.2. The use of frozen and non-implantable embryos for research	45
1.3. Prenatal adoption of embryos	47
2. Reproductive technologies	48
2.1. In vivo and in vitro procreation	48
2.2. Therapeutic and non-therapeutic finality	50
2.3. The manipulation of embryos	51
2.4. The access to reproductive technologies and transformations of parenthood	53
2.5. The donation of the gamete	57
2.6. Informed consent to reproductive technologies	59
2.7. The model of freedom and the model of responsibility	61
3. Surrogate motherhood	62
3.1. Forms of surrogacy	62
3.2. Altruistic and commercial surrogacy	62
3.3. The risks of instrumentalisation	66
4. Artificial womb	67
4.1. Technological possibilities of ectogenesis	67
4.2. Therapeutic and non-therapeutic goals	67
4.3. The artificialisation of birth	70
5. Gen-ethics	71
5.1. Diagnose, therapy and alteration in genetics: ethical issues	71
5.2. Genetic selection and the risks of eugenism	78
5.3. The access to information and genetic tests	82
5.4. Reproductive cloning	84
5.5. The so-called 'therapeutic' cloning	88

	<i>page</i>
<b>II. Questions at the end of life</b>	<b>91</b>
1. Therapeutic obstinacy	91
1.1. Theoretical distinctions between proportionality and non-proportionality	91
1.2. Practical applications	93
1.3. The case of premature babies	97
2. Euthanasia and assisted suicide	99
2.1. From postponing to anticipating death	99
2.2. What is not euthanasia	101
2.3. What is euthanasia (and assisted suicide)	103
3. The refusal of treatment	105
3.1. The refusal and renunciation of therapies	105
3.2. In condition of autonomy	106
3.3. In condition of dependency	107
4. Persistent vegetative state	109
4.1. The condition of persistent vegetative state	109
4.2. The right to suspend/refuse hydration and nutrition	110
4.3. The right to be cared for	110
5. Living will and advance care directives/statements	111
5.1. Advance decisions/wishes of treatment	111
5.2. Living will: the binding right to die	113
5.3. Advance care statements: wishes to be taken into consideration	116
6. Palliative care	121
6.1. Palliative care as a right	121
6.2. Deep sedation as a 'hidden' euthanasia	122
6.3. Deep sedation as palliation	123
7. Ascertainment of death	125
7.1. Definition of death	125
7.2. From cardio-respiratory to brain criteria	125
7.3. The total brain death or the death of the whole brain	129
8. Organ transplants	130
8.1. Organ from living donors	130
8.2. Organ donation from corpses	132
8.3. Specific issues	134

	<i>page</i>
8.4. The case of the so-called 'Samaritan donation'	135
8.5. The trafficking in human organs	136
9. Use of bodies for research	137
<b>III. Curing and caring for human beings</b>	<b>139</b>
1. Social bioethics: minors, old people, disabled persons	139
1.1. Particular vulnerability	139
1.2. Minors	140
1.3. Elderly	144
1.4. Disability	146
1.5. Care ethics	150
2. Intercultural bioethics: migrants and health	154
2.1. Ethno-ethics	154
2.2. Ethnocentric bioethics, multicultural bioethics and intercultural bioethics	156
2.3. Health in a global perspective	160
3. Allocation of health care resources and the right to be cured/cared for	162
3.1. Justice and the distribution of scarce health care resources	162
3.2. Minimum state, maximum market	164
3.3. Cost/benefit analysis	166
3.4. Maximum state, minimum market	168
3.5. The dignity of every person and the common good	170
