## Chapter 1

### ***Microeconomics and markets***

1. Introduction	1
1.1. Why choose	1
1.2. The choice in market regimes	6
1.3. What happens in a market regime	17
2. Microeconomics and the demand curve	23
2.1. The value of a good	23
2.2. The demand curve	26
2.2.1. To read a demand curve	26
2.2.2. The importance of the demand curve	28
2.2.3. Changes in the demand curve with respect to the price	30
2.3. Elasticity of the demand curve	33
3. The supply curve and microeconomics	43
4. Equilibrium and microeconomics	48

## Chapter 2

### ***Consumer Choice***

1. Value of a good and role of preferences	53
1.1. Objectives and rationality	53
1.2. Preferences: first assumptions	55
1.3. Preferences: the utility function	61
1.4. Preferences: indifference curves	64
1.4.1. Properties of indifference curves	64
1.5. The choice: the exchange towards the optimal basket	73
1.6. The choice: spending towards the optimum basket	76

## Chapter 3

### ***Building a demand curve***

1. How does choice vary as income changes?	89
--	----

	<i>pag.</i>
2. How does choice vary with price?	99
2.1. The optimal choice	99
3. The demand curve	107
3.1. The firm and the aggregate demand curve	107
3.2. Again on the elasticity of the demand curve	110
4. The consumer surplus: the measure of the value of choices	114
4.1. The surplus theory ...	114
4.2. ... and the practice of the surplus	120

## Chapter 4

### ***The entrepreneur's choices***

1. Profit maximization and nature of the enterprise	129
2. The nature of profit	131
3. The constraint of technology	135
3.1. The cost control department	135
3.2. The natural constraint of technology	137
3.3. An important parenthesis: marginal and average factor productivity	142
3.4. Properties of isoquants	146
4. The choice of how to produce	151
4.1. Fixed inputs and isocosts: the role of time	151
4.2. The concept of isocosts and the long-term choice	153
4.3. The cost function and the choice of how to produce in the short term	155
4.4. The long-term cost function	165
4.5. The relationship between short-term and long-term costs	176
5. The choice of how much to produce: produce or not produce?	179
5.1. Short-term profit maximisation	181
5.2. Maximising profit in the long term	186

## Chapter 5

### ***Market regimes: perfect competition and monopoly***

1. The perfect competition	189
1.1. Market regime definitions and conditions for perfect competition	189
1.2. The supply curve of the firm and the industry	195
1.2.1. Short-term offer curves of the individual firm	195
1.2.2. Short-term supply curve of the industry	201
1.2.3. Long-term supply curve of the industry when there is freedom of entry	204
2. The monopoly regime and market efficiency of perfect competition	210
2.1. The monopoly	210
2.2. Efficiency: a comparison between competition and monopoly	216
2.2.1. On the concept of efficiency: positive economics and normative economics	216

	<i>pag.</i>
2.2.2. The Edgeworth box and the efficiency criterion according to Pareto	218
2.2.3. Problems in the efficiency criterion according to Pareto. The Marshallian improvement criterion	223
2.2.4. The efficiency of the perfect competition regime	226
2.2.5. Is the monopoly regime inefficient?	231
3. Concluding remarks on equilibrium in a market of perfect competition	238
3.1. Equilibrium stability	238
3.2. General economic equilibrium	241
