Foreword of Raul Espejo	xiii
Foreword of Jim Spohrer	xvii
Preface	xxiii
I. Epistemological premises	
1.1 Scientific progress and its qualification	1
1.2. An initial formalization of a scientific approach: induction	2
1.3. A radical revision: falsification	6
1.4. Science proceeds by paradigms	11
II. Systems thinking	
2.1. Introduction	17
2.2. The first formulations of systems thinking and the founding concepts	19
2.3. The consolidation of formal theories	26
2.4. Conceptual extension to social systems	28
2.5. The decision maker as constructor of reality	30
III. The firm as a viable system	
3.1. Introduction	57
3.2. Viable systems representation of the firm	59
3.3. The concept of a viable system	65
3.3.1. The Principles of the Viable Systems Approach (VSA)	67
3.3.2. First theoretical derivations based on the VSA principles	85
3.4. The conceptual matrix of the VSA	90
3.4.1. The main concepts of the conceptual matrix	97

	<i>page</i>
3.4.1.1. From random grouping to system	98
3.4.1.2. The organizational scheme	104
3.4.1.3. Relations and interactions	107
3.4.1.4. The matrix representations of the structure	109
3.4.2. Some derivations from the eidos principle: from the business idea to the emergence of the firm as a viable system	111
IV. The conceptual difference between decision making and problem solving	
4.1. Corporate governance as a typical problematic area of <i>Decision Making</i>	159
4.2. Business management as a typical problematic area of <i>Problem Solving</i>	164
4.3. Towards a decision-making model based on the <i>Viable Systems Approach</i>	166
V. Possible decision-making areas	
5.1. Introduction	169
5.2. From <i>simple</i> to <i>complex</i> through <i>complication</i> and up to <i>chaos</i>	179
5.3. The dynamics of knowledge	192
VI. The viable system as a universal model for decision-making processes	
6.1. The viable system as an endowment of information variety	205
6.2. The characteristics of the Information Variety Model (IVM): value categories, interpretative schemes and information units	208
6.2.1. The concept of culture and elucidations on knowledge	216
6.3. The Information Variety Model (IVM)	219
6.4. The factors of change of the Information Variety: Consonance and Resonance	227
